# Work Stations Integration for Efficiency

Working with automation engineers, facilities engineers and planners, our engineers plan, design and build Work Stations that integrate lab robotics into the facility.

Modular and ergonomic designs are based on years of experience in industrial engineering and are rugged and built to last.

Concept design begins at the quoting stage and is followed through until final designs are approved.

Work Stations for:

Hudson Plate Cranes  
Genevac HT-4  
Robbins Tango  
Tecan Genesis RSP's  
Hydra 384  
Coherent Lasers  
Cartesian URSYS 2000  
Biotek Elix MicroPlate Washer  
ScanArray 5000 Autoloader  
Zebra 90Xi II  
SpectraMax Plus  
ViewLux  
Ultramark
